Product(s) Used:	AMPEX2015F, AMPEX2020F
Applications:	Residential and Snowmelt

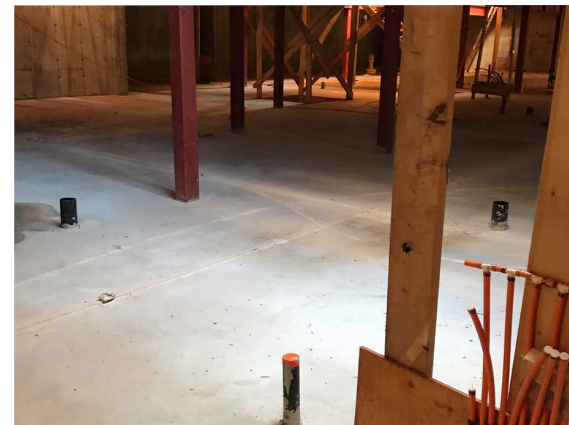

Q+A:

Q. What was the major benefit of using Amvic™ over alternative in-floor heating panels?

A. The major benefit of using Amvic's PEX panels is that they are easy to work with and extremely durable.

Q. Why did you choose Amvic™ ICF?

A. We were looking for a product with high R-value and ease of use for this project to keep our operational cost low, without compromising the quality and efficiency of the end result. We found that the Amvic PEX panels met and exceeded these expectations.

Alleguard Advantage

- Time and labour savings
- Even heat distribution
- Strength and durability
- Lower heating and cooling costs
- Less damage and waste on site
- Superior pipe grip
- Surface resists boot and barrow damage

Quote

“We have worked with different products in the past and when we started to work with Amvic products we noticed a big jump on the quality of material as well as ease of use, which saves us a lot of time in the projects, and the end result is more satisfying for us and our clients.

“After using the Amvic PEX Panel, we don’t use any other panel for our in-floor heating jobs.”
