

Panther Premium Logistics

PROJECT OVERVIEW

Project Name:	Panther Premium Logistics
Project Type:	Heavy Commercial
Location:	Sharon Township, Ohio
Size (Sq.Ft.):	50,000 Sq.Ft
Floors:	1 Storey
Installer:	Johnson Masonry Inc.
Product(s) Used:	Amvic™ Insulated Concrete Forms

Q+A:

Q. *What was the major benefit of using Amvic Insulated Concrete Forms over conventional construction?*

A. The major benefit of using Amvic ICF was time and cost. With ICFs we were able to stack and pour relatively quickly. Our lead times were cut drastically, and sound attenuation and R-value were an added bonus over conventional construction.

Q. *Why did you choose Amvic?*

A. We chose Amvic because of the strong relationship we have with The Henry Bierce Company, a distributor of Amvic.

Alleguard Advantage

- Strength and durability
- Speed and ease of installation
- Lower operating costs
- Noise and fire resistant
- Better R-Value
- Airtight construction
- Time and labor savings

Installer Quote

"In over 25 years, Panther Premium Logistics was one of the quickest builds I have ever performed. I was very happy with the durability of the Amvic ICF, the shipping and service was on time and the sales rep at Amvic was very helpful. The locking system on the 8" ICF was very strong and eliminated any blowouts. It was an extremely clean build and I have no intention on using any other ICF after this project!"

*Michael Johnson, President,
Johnson Masonry Inc.*

Distributor Quote

"As a supplier, credibility is everything to us. The quality of AMVIC products enables us to meet and exceed the expectations of our clients."
