Installer:	Newcon Insulated Foundations
Product(s) Used:	Amvic™ Insulated Concrete Forms

Q+A:

Q. *What was the major benefit of using Insulated Concrete Forms over traditional construction methods?*

A. “Not only were we able to build through the winter and finish ahead of schedule, but ICF also provided noise attenuation which is ideal for hotels and beneficial to the comfort on the occupants. The ICF envelope also helps the owner reduce maintenance and operating costs.”

The Hampton Inn Ottawa, is a rare large ICF footprint in the region. ICF has been developing in the residential space but is now moving to large commercial hospitality projects.”

Alleguard Advantage

- Rigid continuous insulation
- Speed and ease of installation
- Energy efficient and sustainable
- Lightweight, durable and easy to handle
- Innovative insulation solutions

Installer Quote

“Amvic ICF was chosen because of its robust design. The higher web count and high quality EPS foam allowed us to use forming techniques never used in residential construction with confidence.”

*Dave Dallow
ICF Installer and Distributor*
