

Chartrand Carpentry

PROJECT OVERVIEW

Project Name:	Chartrand Cottage
Project Type:	Personal Build, Residential
Location:	Muskoka, Ontario
Size (sq.ft.)	1,000+ sq. ft.
Floors:	1 Storey and garage
Installer:	Owner, Carpenter
Product(s) Used:	Envirostrap Rigid Insulation

Q+A:

Q. *What was the major benefit of using Amvic over other exterior rigid board materials with or without integrated strapping?*

A. "For me it would have to be the advantage of not having to do the two processes. It's basically cutting the labour in half, The strapping is good quality 1-inch plywood which is superior to a three-quarter inch spruce which is what we would typically use."

Q. *Why did you choose Amvic??*

A. "I used Envirostrap because I was looking for a better way to use a rigid Exterior insulation to give us a thermal break on our framing."

Alleguard Advantage

- Rigid continuous insulation.
- Speed and ease of installation
- 2-in-1 solution incorporating insulation and finish attachment surfaces
- Lightweight, durable, and easy to handle

Installer Quote

"The accessibility to the product could not have been better. The delivery and service from Everything ICF is second to none could not ask for a better service."

Charles Chartrand
Owner

Distributor Quote

"We've worked with multiple brands of ICF and rigid insulation, but have yet to find one of better quality than Amvic. Their product innovation is constantly raising the bar and solidifying their position as industry leaders. Their team is extremely knowledgeable, friendly, and fast, ensuring a great experience every time."
