

Kraft Family Farm + Workshop

PROJECT OVERVIEW

Project Name:	Kraft Family Farm
Project Type:	Farm & Recreational Shop
Location:	Balaton, Minnesota
Size (Sq.Ft.):	4,800 Sq.Ft
Floors:	1 Storey
Amvic Installer:	Brandt Heating/AC
Amvic Product(s) Used:	Ampex Insulated PEX panel

Q+A:

Q. *What was the major benefit of using hydronic in floor heat over alternative heating solutions?*

A. The comfort of not having a loud furnace blowing all the time and having a heated floor that is always dry is priceless.

Q. *Why did you choose Amvic?*

A. I was looking for a solution with impressive strength and the Ampex Panel was extremely durable from start to finish.

Amvic Advantage

- Strength and durability
- Even heat distribution
- Less damage and waste on site
- Superior thermal performance
- Surface resists boot and barrow damage
- Time and labor savings

BUILD TO A HIGHER STANDARD

Owner Quote

“The installation process was very quick and easy. It also worked very well with our in floor heating lines as we weaved them throughout the floor. Considering the space of the shed and office it was very time efficient and low labor intensive. I felt that it also kept the re-rod in place and eliminated the hassle and cost of staples. The contractors commented several times on how convenient it was to work with and how durable it is as they walked on the product while pouring the concrete. I would definitely use it in another building, house, etc. We feel this product was very cost effective and has been profitable in our farming business already.”
