Location:	Boise, Idaho
Size (Sq.Ft.):	2,931 Sq.Ft
Floors:	1 Storey
Amvic Installer:	Innovative Custom Homes
Amvic Product(s) Used:	Insulated Concrete Forms

Q+A:

Q. *What was the major benefit of using Amvic Insulated Concrete Forms over conventional construction?*

A. The major benefit of using Amvic ICF was that the product met with my vision for this particular home which was to be innovative and stand out from other builders.

Q. *Why did you choose Amvic?*

A. I chose Amvic because of my relationship with the Amvic Rep and the benefits that their ICFs offer.

Amvic Advantage

- Strength and durability
- Speed and ease of installation
- Energy efficiency
- Reduced maintenance costs
- Better R-Value
- Airtight construction
- Time and labor savings

BUILD TO A HIGHER STANDARD

Builder Quote

"I chose ICF because I wanted something to differentiate myself from the other builders in the Treasure Valley and when I first saw it and met Trevor, it was a very interesting construction method that I had heard about but had not seen. Also, energy efficiency is something that is important to most of my clients and ICF is a cost effective way to far exceed the standard "Energy Star" rating that most other builders in our market are building. Plus, I saw it as an opportunity to take control of timelines early on in building by putting together a team for ICF install and framing."
