

EPS Cold Chain Solutions

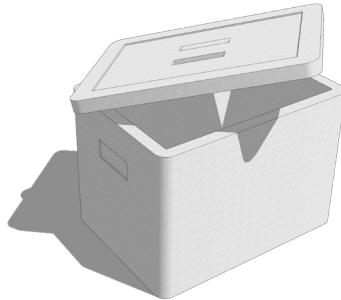

Alleguard cold chain packaging solutions are **100% recyclable** and offer lightweight, cost-effective temperature control that maintains the integrity of frozen, refrigerated, perishable, and temperature-sensitive products. Whether your product is kitted or requires gel packs, we can design and create the total packout that's perfect for your product. Our custom solutions are third-party tested at ISTA certified labs to ensure effectiveness.

Six-Panel Box Liners

Alleguard Six-Panel Box Liners can be customized to fit boxes of any size. We can also customize liner thickness to fit any application.

- Cost-effective
- Maintains temperature
- Customizable
- Recyclable

Molded Coolers

Alleguard molded insulated shipping containers offer lightweight, cost-effective temperature control for various temperature ranges ideal for frozen, refrigerated, perishable, and temperature-sensitive items.

- Lightweight
- Shock-absorbent
- Cost-effective
- Maintains temperature

XDS Solutions

Alleguard XDS™ Extended Duration Shipping containers are designed to keep products temperature controlled for longer shipping durations, offering you more options and greater savings.

- Extended Duration Shipping containers
- Sustainable
- Cost-effective

Alleguard creates custom cold chain packaging solutions to fit any temperature-sensitive application, from beverages and meal delivery services to pharmaceutical and life science products. We also offer pre-assembled kits to deliver end-users with ready-to-use solutions.

About the Manufacturer

We have a combined 60-year history and proven track record to address our customers' needs. What began as a collection of regional businesses has become an international network of designers, engineers, manufacturers and specialists working as one to provide unmatched service and support to our customers. Whether our customers are in construction, protective packaging, cold-chain or other industries, we are relentless in seeing around corners, and going the extra mile to help your business succeed.

Sustainability

Sustainability is one of our top priorities. We're driven to identify new environmentally advantageous materials and methods of production and operating. EPS helps create a more sustainable world by making products more energy efficient, reducing greenhouse gas emissions, preventing product damage and waste, and reducing shipping fuel usage, just to name a few. We pride ourselves on being good stewards of our environment and customers' visions.

Biodegradable EPS Foam offers all of the benefits of traditional EPS – high compressive strength, energy efficiency, and sustained performance – and it's biodegradable. Biodegradable Foams can be substituted for EPS in applications from packaging to cold chain solutions. Alleguard EPS solutions are available in both **biodegradable foam** and **30% recycled material**, that is 100% recyclable and gives you the same protection performance as traditional EPS.
