Project Type:	Light Commercial
Location:	Wroxeter, Ontario CA
Size (sq.ft.)	28,800 sq. ft.
Floors:	1 storey
Distributor:	IsoMatrixx Building Supply
Product(s) Used:	Amvic™ ICF & Ampex Panel

Q+A:

Q. What was the major benefit of using Amvic™ ICF over traditional construction methods? Describe how this project maximizes the advantages of ICF construction.

A. "In my opinion, ICF is the only way to build—it's fast, incredibly durable, and highly efficient, providing unparalleled stability in any weather conditions. Unlike traditional construction methods, ICF walls, once poured, become virtually indestructible, removing any concerns about walls collapsing under severe winds or other environmental pressures.

The solid, reinforced structure provides long-term reliability, making it ideal for projects requiring resilience and energy efficiency. And with a skilled and dedicated team like this one, who truly understands the intricacies of ICF construction, you're guaranteed a build that stands the test of time."

Alleguard Advantage

- Rigid continuous insulation
- Speed and ease of installation
- Energy-efficient and sustainable
- Lightweight, durable and easy to handle
- Innovative insulation solutions

Distributor Quote

“Pricing and quality of work were key factors in the decision-making process. The company has built a strong reputation within the industry for delivering high-quality work, which gave us confidence in their capabilities. Additionally, their efficiency in managing ICF crews was particularly impressive, helping ensure projects were completed smoothly and effectively.”
